

Project Update 3-11-26

CR Construction will be installing new services next week, starting at the east gate and working west on Sahalee Drive West. Contractor is currently grinding and preparing for the service installations. The new services will be installed alongside the existing services.

The District will provide a schedule and distribute door hangers to affected homes prior to tying the new services into the residences. During the tie-in process there will be temporary service disruptions; however, installing the new services in advance will help minimize the length of the shutdowns.

CR Construction will be performing a tie-in at the intersection of NE 36th Street and Sahalee Way on Thursday, March 19. The scheduled shutdown will occur from 8:00 AM to 5:00 PM and will affect six homes, which will be out of service during that time.

D01 (B) – Sahalee Way NE & NE 36 ST

# of Valves Turned	2
# Houses Impacted	6
