

**Project Update for the week of 3/23/26**

The contractor will begin installing new water services next week, starting at the 2500 block of Sahalee Drive East and progressing west along the west side of Sahalee Drive East towards the 2200 block.

District staff will distribute door hangers to affected homes prior to connecting the new services. During the tie-in process, there will be temporary water service disruptions.

Water main work has been completed on Sahalee Way from NE 37th Way to the north gate of Sahalee on NE 36<sup>th</sup> Street. Temporary paving may occur on NE 36th Street next week and traffic interruptions should be held to minimum.
